IntoFocus AI

BRAND GUIDELINES · OCTOBER 2026

Brand Book

How IntoFocus looks, sounds and shows up. One system for every surface.

Be the brand that AI recommends.

IntoFocus AI builds and implements org-ready agentic teams, sold as Modules. Each Module solves one defined problem, is implemented for the client's business, and is kept current as AI changes.

THREE PRINCIPLES

Premium is shown, never claimed.

01

Restraint

A near-black field, quiet type and one cool accent. Fewer things per screen.

02

Proof

Real product screens, named results and sourced figures do the selling.

03

Control

Governance language throughout: approval gates, named owners, clear next steps.

One mark, two grounds.

Dark. The website, dark slides, email headers.

Light. Proposals, reports, documents, print.

THE LOGO SET

A version for every space.

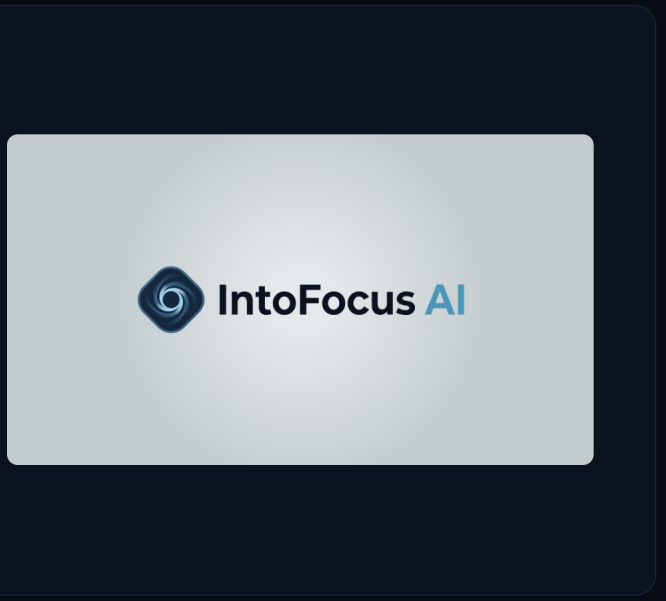

Stacked

Square or tall spaces: signage, merch, title pages, closing slides.

Icon

Favicon, app icon, LinkedIn and social avatars. Works on light and dark.

Silver presentation

Full-bleed title and closing slides, video end cards. Never a UI surface.

LOGO RULES

Give it room. Leave it alone.

Clear space. The height of the “I” in IntoFocus on every side.

Minimum size. 120px wide for the full logo on screen, 16px for the icon.

Files. SVG for web and print, PNG for slides, documents and email.

Always the supplied files. Never rebuild the logo in a font.

Do not stretch or squash

Do not recolor

Do not place on busy backgrounds

Do not add glows, or use light on dark

Dark is the brand.

THE ICE BLUE FAMILY

Every blue comes from one family.

COLOR RULES

One accent per view.

Ice blue is earned. One headline phrase, eyebrows, links, key numbers. If two things compete in ice blue, one is wrong.

Depth without effects. Two close dark tones, page and card. No shadows, glows or gradients.

Charts. At most two blue series, told apart by lightness. Everything else is gray.

Light theme for proposals, reports and print. Accent becomes ice-800.

Status colors are separate. Oxblood, Champagne and Pine mark bad, okay and good data, and nothing else. They are never the accent.

LIGHT THEME

PROPOSAL

Be the brand that AI recommends.

Body text in #334155 on white, captions in #475569.

Book a strategy call

STATUS COLORS

Three colors, one job.

BAD DATA ✕

Oxblood

Main on dark	#CC5B63
Deep tile fill	#6E1F2A
Night card tint	#230F14
Ink on light	#8C232F

OKAY DATA —

Champagne

Main on dark	#D4B66F
Deep tile fill	#7F6420
Night card tint	#262010
Ink on light	#6E5617

GOOD DATA ✓

Pine

Main on dark	#6AB792
Deep tile fill	#17583F
Night card tint	#0E2420
Ink on light	#1F6B4F

Data only. Use Oxblood, Champagne and Pine only for data points that are bad, okay or good for the brand.

STATUS COLORS · IN USE

Color follows the data.

ON DARK · SAMPLE VALUES

23	58	91
✕ Poor	— Fair	✓ Good

ON LIGHT · SAMPLE VALUES

23	58	91
✕ Poor	— Fair	✓ Good

Data only.
Oxblood, Champagne and Pine appear only on data points that are bad, okay or good for the brand.

Mark and word.
Every status color travels with a mark (x, dash, check) and a word, so meaning never rests on color alone.

Not an accent.
Never for buttons, links, logos, illustrations or chart series. Ice blue stays the one accent.

Right value.
Main on dark pages, Ink on light pages, Deep as a tile fill with white text, Night as a dark card tint.

Geist, with a mono for data.

Aa

Geist

Headlines at 600, body at 400. Never heavier than 600.

0123

Geist Mono

Eyebrows, labels, sources and table numbers only.

TYPE SCALE (WEB PX)

Weight does the work.

DISPLAY · 56/60 · 600	**Implemented.**
HEADLINE · 42/46 · 600	**Make it you.**
BODY · 17/27 · 400	Each Module solves one defined problem and is kept current.
EYEBROW · 11/16 · MONO	AI SEARCH + PRODUCT SELLERS

“The model is going to name someone. Make it you.”

Direct, confident and outcome-first. Short sentences. Urgent, never hype.

Lead with what the buyer gets. Then explain how.

HOW WE WRITE

Show premium. Never claim it.

We do

- Source every figure
- Answer first: 40 to 60 words under each question heading
- Vary sentence length on purpose
- Write buttons as verb plus object

We never

- Use contractions, emojis or em dashes
- Say “premium”, “luxury” or “best-in-class”
- Invent numbers, clients or claims
- Write delve, seamless, unlock or game-changer

Names: Module · AI Search + Product Sellers · AI Consensus Control (AEO + GEO) · AI Project Desk · AI Truth Snapshot · AI Truth Roadmap · Lookout, Co-Pilot · Presence, Portrayal, Proof

Built from the same parts.

View Modules

Buttons

One near-white primary per view. Outlined secondary.

EARLY ACCESS

Be the brand AI search recommends.

Section header

Mono eyebrow, one accent phrase, optional rule.

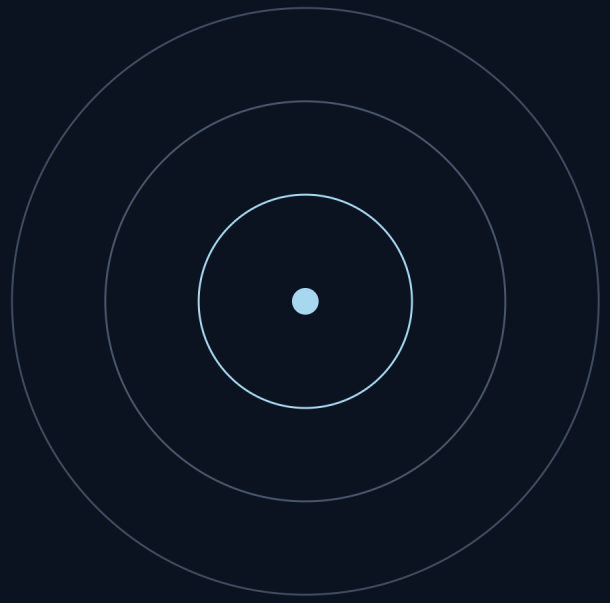

[00%]

[One-line claim about the figure.]

SOURCE: [CITE]

Stat card

Big number, one-line claim, always a source.

The focal point. Flat rings around an ice-blue dot, marking “the answer”. Use sparingly.

IMAGERY

Proof over pictures.

Use

- Real product screens
- Named client results
- Approval and process flows
- Short ice-blue accent rules

Avoid

- Stock people at laptops
- Robots, brains, circuits
- Particle fields and glows
- Purple-blue gradients

Three kinds of image, in this order.

1 · PROOF VISUALS

Real report screens, charts and captured AI answers with platform and date. Highlight one series.

Written approval for named results; anonymize the rest.

2 · BRAND GRAPHICS

The focal point rings and the swirl icon, cropped large and quiet. Flat, no glows or gradients.

Section dividers, email headers, social backgrounds.

3 · PHOTOGRAPHY

16:9 · 16PX CORNERS

Use sparingly: client product shots and real customer moments. Natural light, tight crops, graded cool and slightly desaturated.

Hairline border. No team portraits for now.

Never. Robots, glowing brains, binary rain, handshakes, stock offices, AI-generated people or invented dashboards.

ICONS

Thin lines, one color.

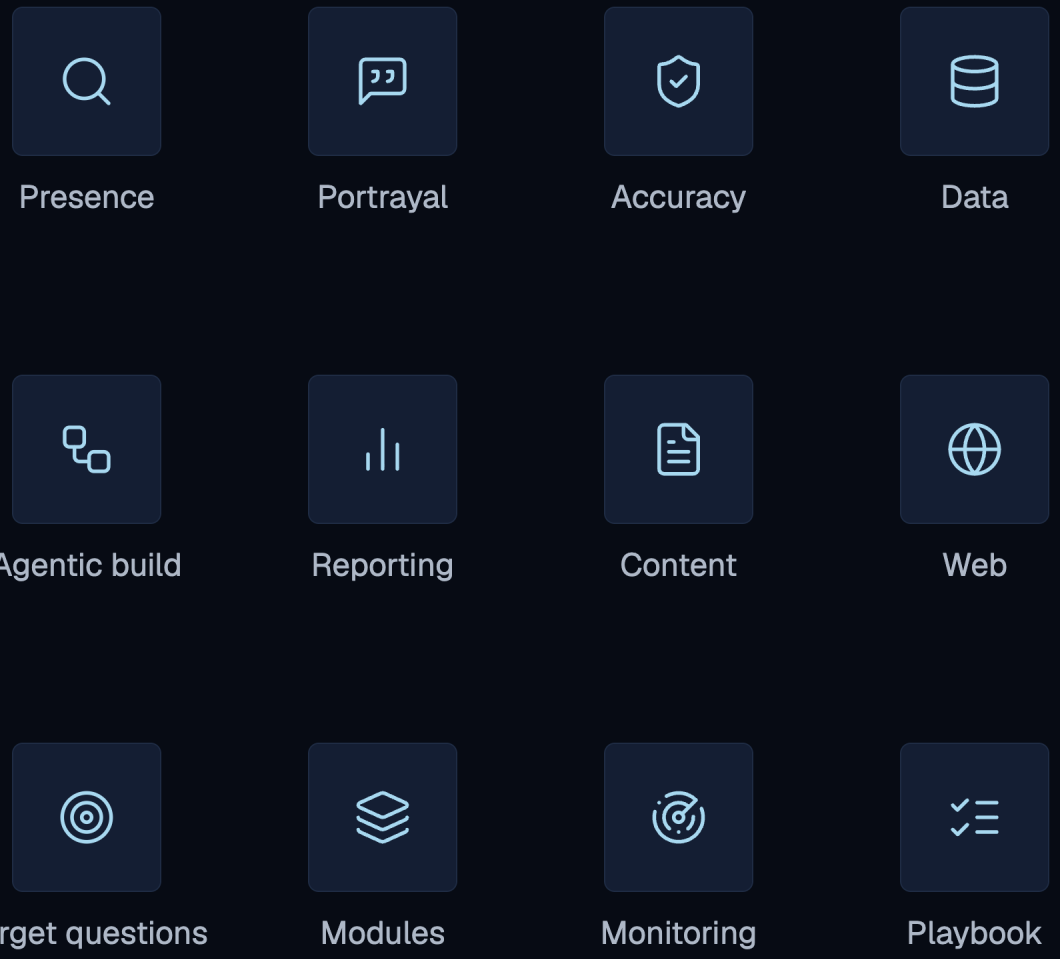

Style. Line icons, 1.5px stroke on a 24px grid, round ends.

Color. ice-300 on dark, ice-800 on light. Never multicolor.

Sizes. 24, 32 and 48px. In cards, a 56px tile with an 8px radius.

Use. One per card or row. Icons never replace words.

Email. Use the PNG files at 2x. Email clients drop SVG.

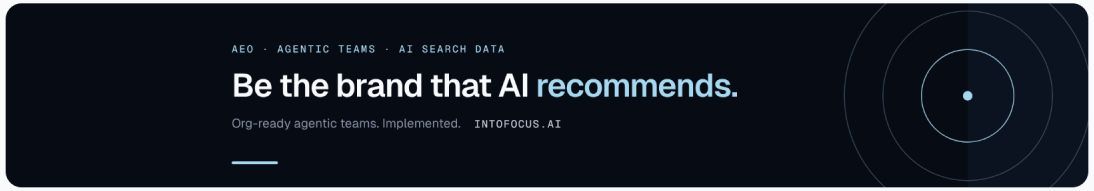

The same system, five places.

Channel	Lead visual	Icons and details	Theme
Sales decks	One proof visual per slide	48px icon tiles on Module cards; client logos in platinum	Dark
Website	Product or data visual, or the rings. No stock hero	Icon tiles on Module pages; SVG and WebP; alt text on every image	Dark
Newsletters	One chart or stat graphic, 600px wide at 2x	PNG tile icons at 2x; ice-800 pill button; no background images	Light
Social	Stat cards, quote cards and the rings	One template, one icon at most	Dark
Proposals	Charts and tables	Almost no icons; sources under every chart	Light

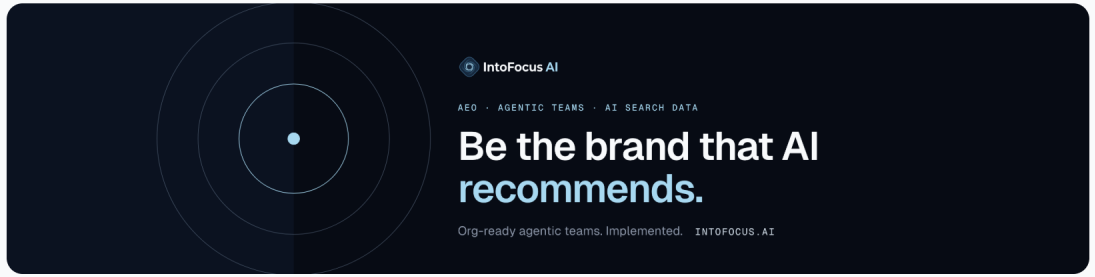

IN USE

LinkedIn, done right.

Company page cover

1128 × 191. Text clears the page logo in the lower left.

Team profile banner

1584 × 396. Text on the right; rings sit behind the profile photo.

IntoFocus AI PROPOSAL

AI SEARCH READINESS

Be the brand that AI recommends.

A 90-day plan to close the gap between how [Client] sells and how AI describes it.

[00%]
[SOURCE]

90
DAYS

Phase	Outcome
Presence	Found
Portrayal	Described

CONFIDENTIAL · INTOFOCUS.AI

LIGHT THEME · DOCUMENTS

Proposals, reports and print.

Page. White, 0.75 in margins, light logo top left, mono label top right.

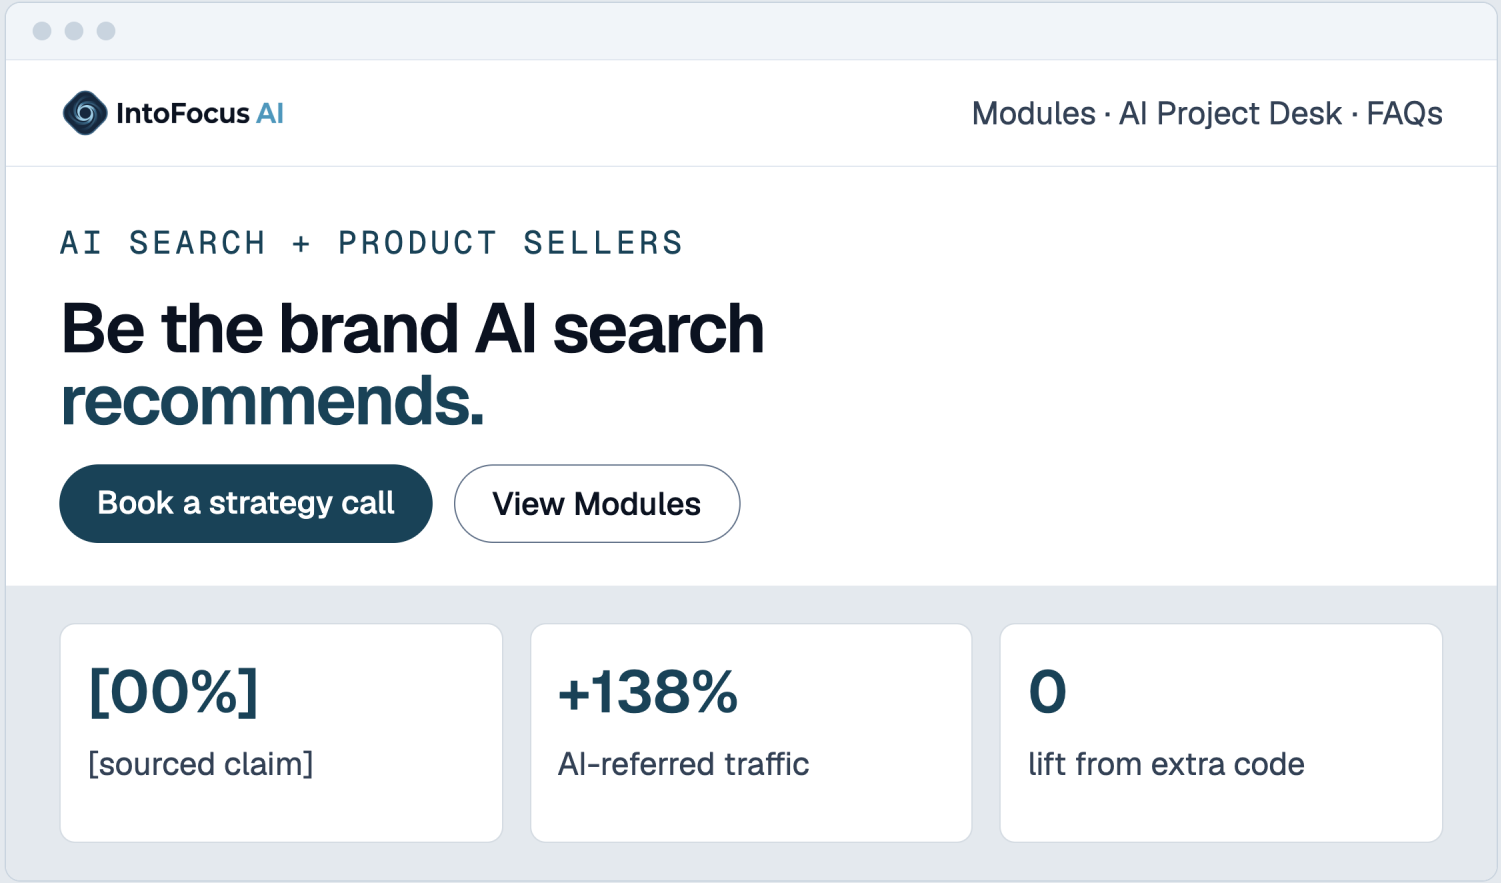

Text. Headlines #0B1220, body #334155, captions #475569.

Accent. ice-800 #194257 for one phrase, eyebrows and key numbers.

Structure. Platinum #E4E9EE for table headers and section bands.

Print sizes. Title 28pt, headings 16pt, body 10.5pt, captions 8pt mono.

Same system, white field.

Field. White page, #F9FAFB cards with hairline borders.

Action. ice-800 button with white text. Links and focus ring in ice-800.

Rhythm. Alternate white and platinum bands between sections.

Switch. data-theme="light" on the page root.

One source of truth.

1. Load Geist and Geist Mono from Google Fonts.

2. Paste the tokens into the site's CSS. Dark is the default; add data-theme="light" to switch.

3. Pull files from the design system, never from screenshots or old slides.

```
